Interest

I have keen interest in Javascript applications and beautiful user interfaces.

I love to learn and build great products.

Javascript, React, Angular, Backbone, CSS, D3, Vim

Work Experience

Frontend developer (remote)

Sept 2017 - Mai 2020

GraphComment

(React, Angular) GraphComment was a solution in Angular with lot of performance issues, I rebuilt it from scratch using React and performance were much better. I also did a lot of maintenance on their existing Angular applications.

Creative developer (remote)

sept 2016 - sept 2017

Marketcolor

(React, ReactNative, D3, SVG/CSS3 animations) Creative agency in London, specializing in complex data visualization, Mobile/Tablet apps and well designed single page websites to showcase goods. I've been working on websites and apps for clients like UBS, Vogue and Wlred

Frontend developer (remote)

july 2015 - july 2016

Crath

(React, D3) Working on an application to manage and analyse consumption in residential and commercial buildings. UI includes lot of visualizations using d3.js.

Frontend developer

feb. 2015 - may 2015

StaffMatch

(React) Hired on a short term project as the first developer. I built a dashboard for an interim company using ReactJS.

Frontend developer (remote)

aug. 2013 - oct. 2014

StarterSquad

(Angular) Working with a few startups during their bootstrapping phase to help them create a MVP. One of the startup was BridalLive (<http://www.bridallive.com>).

Frontend developer (remote)

may 2013 - aug. 2013

Stamplia

(Backbone) Working with Backbone to build an interface allowing to create and customize email templates.

Frontend developer (remote)

nov. 2012 - apr. 2013

Everlution

(Backbone) Built an HR application using BackboneJS (<https://www.manta.hr>).

Frontend developer (remote)

june 2012 - sept. 2012

SparkCentral

(Backbone) In charge to architecture the JavaScript frontend using modern JavaScript tools. The application was dealing with large amount of data coming in real-time from Twitter.

Backend/Frontend developer

sept. 2011 - jan. 2012

Wisembly

(Backbone - SocketIO - Symfony2) Hired as a developer to rebuild a new version of the web application. We successfully managed to get the project done in a few months with a major redesign, lot of performance improvements and a much cleaner codebase.

Backend developer

may 2011 - sept. 2011

SensioLabs

(Symfony2) Backend developer for a french e-commerce (<http://www.laplateforme.com>). I helped build a REST api on top of the existing e-commerce to communicate with a mobile application.

Education

Business School

sept. 2008 - sept. 2010

ESPEME

I dropped to pursue my career in web development.
