Interest

I have keen interest in Javascript applications and beautiful user interfaces.

I love to learn and build great products.

Javascript, React, Angular, Backbone, Symfony2, CSS, Vim

Work Experience

Frontend developer
StaffMatch   fév. 2015 - mai 2015

Built a dashboard and a frontend using React for an interim platform.

Frontend developer (remote)
StarterSquad   août 2013 - oct. 2014

(AngularJS) Worked with a few startups to help them launch their product.

Frontend developer (remote)
Stamplia   mai 2013 - août 2013

(BackboneJS) Worked on an application to create email templates.

Frontend developer (remote)
Everlution   nov. 2012 - avr. 2013

(BackboneJS) Worked on the frontend of an HR application.

Frontend developer (remote)
SparkCentral   juin 2012 - sept. 2012

(BackboneJS) Twitspark is a web based twitter client aggregating tweets and allowing companies to reply in real time. My main role was to work on the frontend and then optimize it for large volume of data.

Backend/Frontend developer
Wisembly   sept. 2011 - jan. 2012

(BackboneJS - SocketIO - Symfony2) Worked on the backend and frontend of Wisembly, a platform to help an audience in taking part of an event in real time via their mobile phone. I've also worked with clients directly helping them to configure our solution on their own servers.

Backend developer
SensioLabs   mai 2011 - sept. 2011

(Symfony2) Worked on an e-commerce powered by Symfony2. On the project I contributed to unit and functional tests, then I worked on a REST api to integrate our database with the mobile version.

Formation

Business School
ESPEME   sept. 2008 - sept. 2010

(I dropped because I was more interested in web development)
